

SOFTWARE STARTUP:

WANTED: EXCEPTIONAL CO-FOUNDERS (DEV & DESIGN) FOR EXCEPTIONAL PRODUCTS

I'm Patrick (entrepreneur and multiple start-up founder) and I am currently looking for 2 co-founders as equal partners for the implementation of one of two strong business ideas in the area of networking and fintech. More information about this personally. After all, the team is more important to me than the idea.

In order to be able to realize one of these ideas, I need support in the following positions (see below).

As a co-founder in the core founding team, you will receive the same shares in the company as the other co-founders. I am looking for people with a lot of heart and soul for outstanding products who would like to start a startup.

We should get to know each other if you are really skilled in at least one or more of the following areas:

- (1) CTO: Software Developer: mobile app & web development | Java, Swift, HTML5 [...] | front & backend
- (2) CDO: UI / UX design: 2+ years of experience as UX / Product Designer. Sound knowledge and interest in digital trends and innovative web/mobile design

FURTHER REQUIREMENTS

- Working time: investment of at least ~ 15-20 hours/week in the startup; the division of work is negotiable / flexible
I am currently working part-time and can therefore work ~>20 hours/week on it.
- Creative, strong in concepts
- Strongly analytical thinking / working
- Great stamina and passion for exceptional (digital) products with real value, intuitive UI/UX and beautiful design
- hard worker, very resilient (physical and psychological), able to grasp tasks with above-average speed and complete them effectively
- Very communicative, organised/structured, very high level of initiative, professional and at the same time easy to deal with, excellent social skills in dealing with team members

NEXT STEPS

1. Idea validation and refinement: customer interviews, surveys, online marketing (already in the process for both ideas)
2. Decision as to which idea should be realized
3. Preparation of the business plan (my part) / UI concept (everyone in the team but especially CDO and me)
4. Definition of the backlog (everyone in the team)
5. Creation of the prototype/MVP / Definition of the tech stack
6. Refine MVP until Product/Market Fit is achieved
7. Development and release of the first complete product version
8. Implementation of the business model and/or seed financing by investors in order to work full time on it

ABOUT ME

- I've founded two software start-ups (4 years with 4 persons). We development two mobile apps - thereby I have valuable knowledge in all start-relevant fields.
- Experience in product and project management of tech products
- My positions within the startups: Focus on product/vision/strategy, product management und marketing/PR.
My profiles: (1) <https://bit.ly/2Fn4Z9s> + (2) <https://bit.ly/2Ku9N0T>
My App & design portfolio: (3) <https://tinyurl.com/y28atc4o> + (4) <https://tinyurl.com/yynt22o8>

If there is any serious interest, I really look forward to hearing from you!

Please add the most important information about yourself/online profile, your most important skills, any references that you have and contact details. Messages that don't meet these criteria will not be answered.
